C62-050-30-B L2 PRO bt Ceiling PoE Switch
Quick Installation Guide

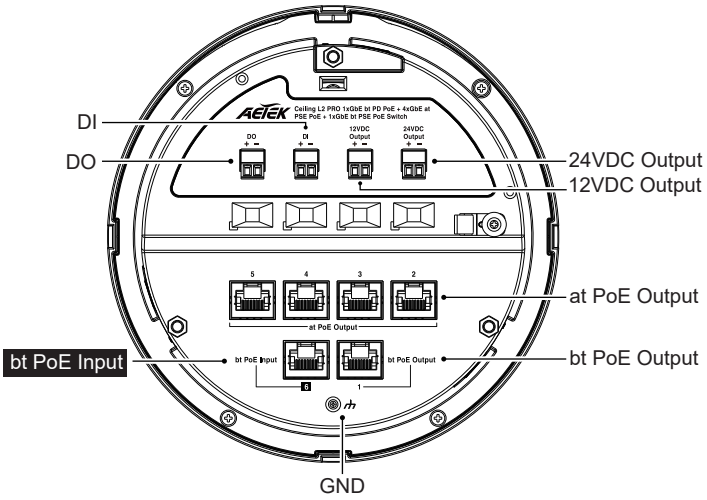

P/N: 5019032501

PACKAGE CONTENTS

* 1x PoE switch	* 1x Quick Installation Guide

CONNECTION

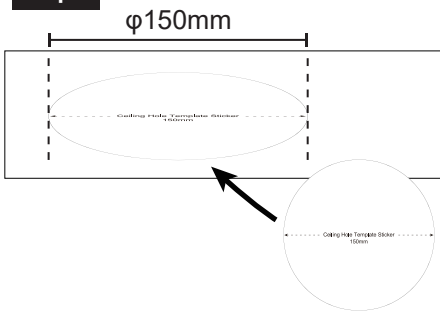

Installed on the system ceiling

1. Attach the ceiling mount bracket to plasterboard, etc.

- It is recommended to add the fastening screw to the hole size of the ceiling, turn it with a screwdriver to install it. The ceiling thickness that can be connected with the clamping bracket is from 5 to 45 mm.
- The recommended screw torque is 7kgf-cm±3.
- Install on the ceiling with sufficient strength.
- If you have to install it on rock wool ceiling and other weak ceiling panels, please provide enough reinforcement.
- The recommended ceiling opening size is φ150mm.
- The recommended minimum space (height) for ceiling switch installation is 140mm (For Installation and CAT5/6 cable routing.)

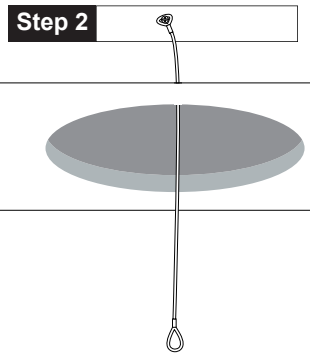

Installation Steps

Step 1

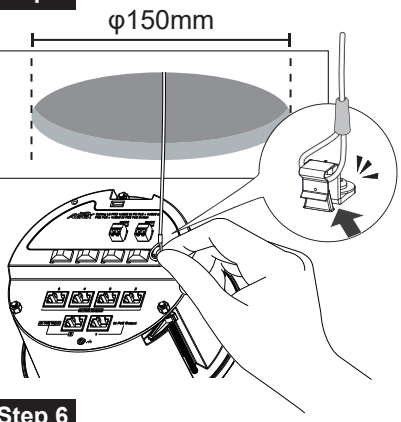

Use the ceiling hole template sticker to dig a hole on the ceiling.

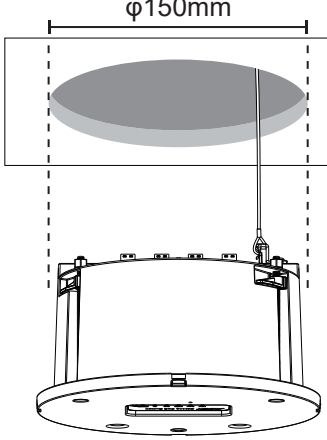

Step 2

Step 3

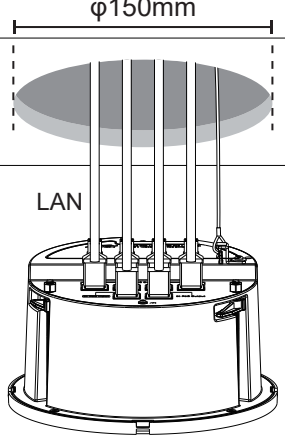

Step 4

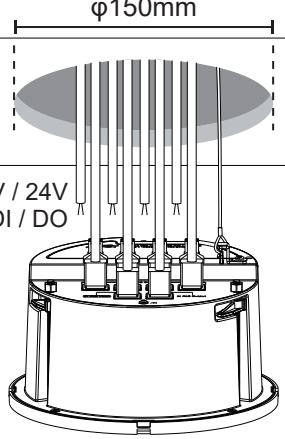

Recommend hole size for mounting ceiling PoE switch is φ150 mm.

Step 5

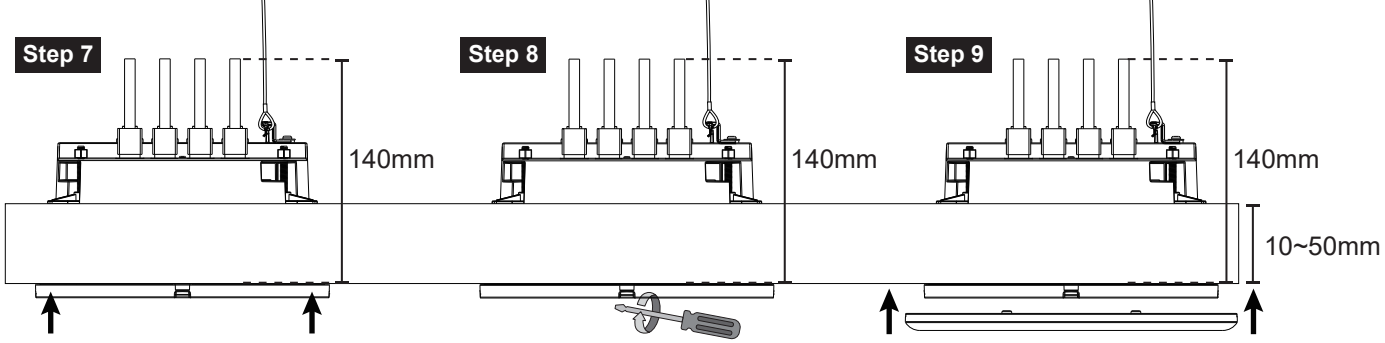

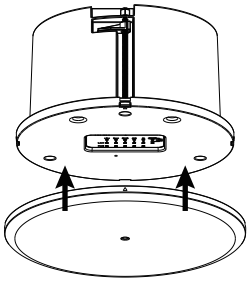

Connect LAN cable to ceiling PoE switch.

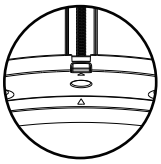

Step 6

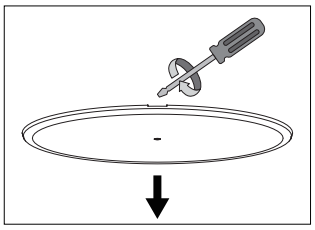

Connect 12V / 24V / DI / DO cable to ceiling PoE switch.

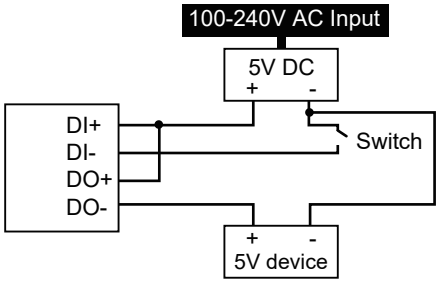

Aligh the triangle markings on the cover and the ceiling switch to snap the cover on the switch.

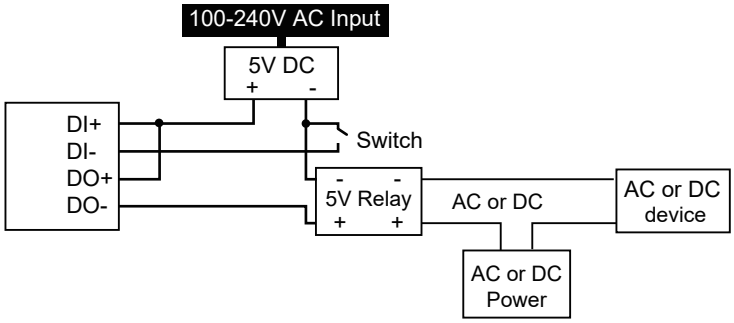

After installing this product on the ceiling, install the included panel. Pay attention to the installation direction, align the groove with the notch on the panel and install it correctly.

- Remove the panel with a flat-head screwdriver.

DI/DO Connection Diagram

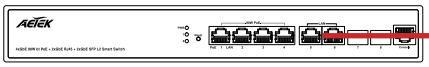

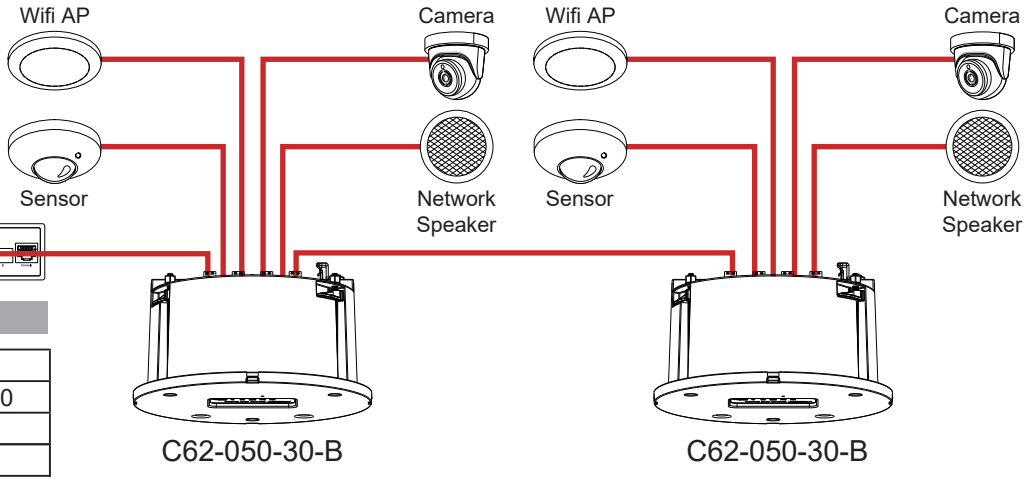

DI/DO Connection Diagram w/ AC or DC Relay

- Ensure that all 12V DC, 24V DC, and DI/DO devices are properly connected before applying or turning on the DC input power. Connecting these devices after the power is on may result in malfunction or damage.
