The E59 series, a small form factor, is an ideal for indoor environments where two units of E59 series can be daisy-chain to prolong range of PoE devices such as PoE cameras, wireless APs reaching up to 300m from end to end or up to 500m by star topology.

No power adapter required, E59 PoE extender is powered by PoE injector, middle-span Hub, or PoE switch over one networking cable extending Ethernet range depending on PD's power consumptions and PSE's power budget per port.

Features

- Small form factor with RJ45 connectors
- Saves costs of re-wiring and add-on Ethernet switches
- Plug-and-Play installation
- Drives the reach beyond restricted 100m Ethernet distance
- Supported PSEs providing 90W/60W/30W PoE
- Daisy-chain 2 units of E59-101 reaching 300m from end to end
- Daisy-chain 2 units of E59-102 reaching 500m by star topology
- Complete unit does not require power
- Extends range up to 200m for speed dome requiring 48W
